

FACTSHEET

TITLE: SPECIAL PERMIT NO. 1995, Hub Hall Heights Community Unit Plan, requested by Hubert H. Hall, for 869 dwelling units, on property generally located northeast of N.W. 48th Street and W. Holdrege Street.

STAFF RECOMMENDATION: Conditional Approval

ASSOCIATED REQUESTS: Annexation No. 02010 (03-70); Change of Zone No. 3390 (03-71); and Preliminary Plat No. 02025, Hub Hall Heights (03R-109).

SPONSOR: Planning Department

BOARD/COMMITTEE: Planning Commission
Public Hearing: 02/05/03 and 02/19/03
Administrative Action: 02/19/03

RECOMMENDATION: Conditional Approval (6-0: Newman, Carlson, Taylor, Bills-Strand, Duvall and Schwinn voting 'yes'; Krieser, Larson and Steward absent).

FINDINGS OF FACT:

1. This proposed community unit plan for 869 dwelling units on approximately 129 acres, and the associated annexation, change of zone and preliminary plat were heard at the same time before the Planning Commission.
2. The staff recommendation of conditional approval is based upon the "Analysis" as set forth on p.4-6, concluding that with conditions, the proposal is in conformance with the Comprehensive Plan.
3. The public hearing was continued for two weeks in an effort to work with an adjacent property owner regarding the extension of N.W. 40th Street.
4. The applicant's testimony is found on p.8-9, including proposed amendments to the conditions of approval on the preliminary plat in response to the concerns raised by Barbara and Martin Erickson regarding the extension of N.W. 40th Street to the north. (See Factsheet for Preliminary Plat No. 02025 (03R-109).
5. Testimony by the owner abutting on the east in opposition to the extension of N.W. 40th Street to the north in the preliminary plat is found on p.9. [Also see Factsheet for Preliminary Plat No. 02025 (03R-109)].
6. On February 19, 2003, the Planning Commission agreed with the staff recommendation and voted 6-0 to recommend conditional approval of the community unit plan, as set forth in the staff report dated January 22, 2003. The conditions of approval are found on p.6-7. The applicant agreed to provide half-street right-of-way and participate in improvements along 40th Street if and when the owner abutting on the east decides to subdivide that property.
7. The Site Specific conditions of approval required to be completed prior to scheduling this application on the City Council agenda have been satisfied.

LINCOLN CITY/LANCASTER COUNTY PLANNING STAFF REPORT

This is a combined staff report for related items. This report contains a single background and analysis section for all items. However, there are separate conditions provided for each individual application.

P.A.S.: Hub Hall Heights **DATE:** January 22, 2003
Annexation #02010
Change of Zone #3390
Special Permit for Community Unit Plan #1995
Preliminary Plat #02025

****As Revised by Planning Commission: 2/19/03****

SCHEDULED PLANNING COMMISSION MEETING: **DATE:** February 5, 2003

PROPOSAL: To annex 142 acres, change the zone from AG, Agricultural to R-3, Residential, preliminary plat 356 lots and 5 outlots and obtain a **special permit for a community unit plan for 869 dwelling units** at NW 48th Street and W Holdrege Avenue.

WAIVER REQUEST: An exception to §26.23.130 to exceed block lengths
An exception to §26.23.140(e) to allow double frontage lots

LAND AREA: Annexation, Change of Zone, Preliminary Plat: 142 acres
Special Permit for CUP 129 acres

CONCLUSION: With conditions the change of zone, preliminary plat, and special permit are in conformance with the Comprehensive Plan. The developer is required to contribute toward the paving of and the cost of the water main in NW 48th Street as part of the annexation.

<u>RECOMMENDATION:</u> Change of Zone Preliminary Plat, <u>Special Permit</u> , Annexation	Approval <u>Conditional Approval</u>
---	--

GENERAL INFORMATION:

LEGAL DESCRIPTION:

Annexation, Change of Zone & Preliminary Plat: Lots 14 and 32 Irregular Tracts, located in Section 18 T10N R6E.

Special Permit: Lot 14 and a portion of Lot 32 I.T., located in Section 18 T10N R6E and more particularly described in the attached legal description.

LOCATION: Generally located northeast of NW 48th and W. Holdrege Streets

APPLICANT: Hubert H. Hall
2320 S. 48th Street
Lincoln, NE 68506
(402)483-2551

OWNER: Charles Gary Gately
Charles Gary Gately Trust and contract interest in:

EXISTING ZONING: AG, Agricultural.

EXISTING LAND USE: Undeveloped.

SURROUNDING LAND USE AND ZONING:

North:	Undeveloped, residential	R-3, Residential
South:	Undeveloped	AG, Agricultural
East:	Undeveloped	AG
West:	Undeveloped, residential	R-3, AG

COMPREHENSIVE PLAN SPECIFICATIONS: The Comprehensive Plan shows this area as Urban Residential (page F-25).

The area is identified as Tier 1, priority A (F-31). Development can occur within the next 25 years and is designated for near term development (F-29).

The Comprehensive Plan encourages efforts to preserve small stream corridors in future developments (F-59).

Guiding Principles for New Neighborhoods encourages:

1. Encourage a mix of housing types, single family, townhomes, apartments, elderly housing all within one area;
2. Similar housing types face each other: single family faces single family, change to different use at rear of lot;
3. Parks and open space within walking distance of all residences;
4. Multi-family and elderly housing nearest to commercial area;
5. Pedestrian orientation; shorter block lengths, sidewalks on both sides of all roads;
6. Public uses (elementary schools, churches) as centers of neighborhood – shared facilities (city parks & school sites). (F-67)

HISTORY:

Date when preliminary plat was submitted:	November 6, 2002
Date when Planning Director’s letter was sent:	December 10, 2002
Date when revised preliminary plat was submitted:	January 6, 2003
Met with applicant regarding grading and drainage issues:	January 22, 2003

The zone was A-A, Rural and Public Use District until the zone was changed to AG, Agricultural during the 1979 zoning update.

UTILITIES: Utilities are adjacent to this site in NW 48th Street. Extension is required as part of the annexation agreement. A 24" water main is proposed in W. Holdrege Street and a 16" water main is proposed in NW 48th Street. The developer is required to pay half the cost of a 6" water main in both streets. All other water mains are of standard sizing. Standard 8" sanitary sewer mains are shown throughout the development. The developer proposes either a force main or pumping station in the south east corner of the plat. The Public Works & Utilities Department is not satisfied with the proposed lift station.

TOPOGRAPHY: Rolling, with several wooded drainage ditches throughout.

TRAFFIC ANALYSIS: NW 48th Street is currently a paved two-lane rural roadway. The Comprehensive Plan classifies NW 48th Street as a Principal Arterial. The developer is required to pay half the cost of a three lane suburban cross section.

West Holdrege Street is unpaved and unclassified, however, the Comprehensive Plan shows 120' of right-of-way for that portion from NW 48th Street east approximately one quarter mile to about NW 45th Street (F-113). East from that point only 80' of right-of-way is indicated for W. Holdrege Street. The developer is currently showing the dedication of 60' for the entire portion of W. Holdrege. This is not required. Only 40' of right-of-way must be dedicated east of NW 45th Street. Local streets are entirely the responsibility of the developer, who may delay the construction of W. Holdrege with a phasing plan approved by the Planning and Public Works & Utilities Departments.

PUBLIC SERVICE: The nearest fire station #11 in Arnold Heights
The nearest public school is Arnold Elementary School
The nearest public library is the Arnold Heights Library

REGIONAL ISSUES: This area is within the Airport Environs Turning Zone. An Avigation and Noise Easement and Covenant Agreement is required.

ANALYSIS:

1. Public Works & Utilities Department had the following comments:
 1. The existing culvert in N.W. 48th Street needs to be shown as per the January 22, 2003 meeting with the engineer.

2. The sanitary sewer needs to be revised in the northeast corner of the plat. It is currently located under the dam of a proposed detention facility. This is unacceptable.
 3. Sanitary sewer has not been extended to the property lines at drainage basin entry points into the development as per the Planning Director's letter dated December 10, 2002.
 4. The proposed alternate to serve the proposed multi-family area with a lift station is unsatisfactory. The multi-family lot cannot be developed until a sewer outlet is available from the east.
 5. The grading in N.W. 41st Court, West Faesy Street, and N.W. 47th Street needs to be revised as per the meeting January 22, 2003. Due to the large grade changes front to back across several areas on this plat Public Works recommends that the grading plan and /or lot layout be revised to provide more desirable lots for building.
 6. Public Works does not approve any drive way location for Lot 30 Block 12 (multi-family area) onto W. Holdrege Street until a final site plan and use for the lot is approved.
 7. The sanitary sewer in NW 47th Street is shown to be 15' deep at the north property line. The sewer will run opposite street grades in NW 47th Street until the first east-west street (W. Thatcher Lane) in the Ashley Heights 1st Addition to the north. This will force the sewer to be deeper than 15'. No waivers of design standards for sewer depth have been approved for the Ashley Heights 1st development. The sewer in this plat must be designed to accommodate the sewer depth at the property line.
 8. The annexation agreement for this plat requires the developer pay for the equivalent of ½ the cost of a 6" water main in NW 48th Street. The developer is required to contribute ½ the cost of a 3-lane suburban cross-section street toward the future urban street paving of NW 48th Street.
2. W. Faesy Place, W. Emily and W. Louse Lanes, W. Megan Court, and W. Jewel Street must be renamed because of existing street names that are similar or the same.
 3. §26.23 requires pedestrian access to be provided in blocks that exceed 1000'. Block 4 exceeds this standard and no waiver was requested or advertised. The applicant must show a pedestrian access in this block.
 4. The pedestrian easement is shown in Block 12 is proposed in an area with a significant grade change from the front of the lot to the rear. A more level location must be found to accommodate ADA grade requirements for this pedestrian sidewalk.
 5. As noted by the Public Works & Utilities Department the general design of the lots in relation to the grading plan is poor. Several lots have a 20' grade difference from front to back. The

Comprehensive Plan considers general desirability of lots. In this case, many lots are not desirable and the grading plan must be revised to eliminate steep grade differences.

6. There are several block lengths that do not meet design standards. W. Faesy Place can be extended northeast to NW 44th Street to help alleviate this problem. The engineer agreed to this at the January 22, 2003 meeting with Planning Department staff.
7. The request to waive block lengths is to preserve existing drainage areas which is consistent with the Comprehensive Plans efforts to preserve natural areas.
8. The request to waive double frontage lots is acceptable. The developer is required to provide screening between the rear of lots and the street.
9. Only 40' of right-of-way is required to be dedicated east of NW 45th Street and should be revised to reflect this standard.
10. The developer is required to pave all locale streets within and abutting this plat. W. Holdrege and NW 40th Streets must be paved with curb and gutter. The developer can delay the construction of these streets by submitting a phasing plan that is found acceptable to the Planning and Public Works & Utilities Departments.

SPECIAL PERMIT CONDITIONS:

Site Specific:

1. After the applicant completes the following instructions and submits the documents and plans to the Planning Department office and the plans are found to be acceptable, the application will be scheduled on the City Council's agenda:

- 1.1 Revise the site plan to show:
 - 1.1.1 All changes required on the preliminary plat.

2. This approval permits 869 dwelling units.

General:

3. Before receiving building permits:
 - 3.1 The permittee shall have submitted a revised and reproducible final plan including 6 copies showing the following revisions and the plans are acceptable:
 - 3.2 The construction plans shall comply with the approved plans.
 - 3.3 Final Plats shall be approved by the City.

STANDARD CONDITIONS:

4. The following conditions are applicable to all requests:
 - 4.1 Before occupying the dwelling units all development and construction shall have been completed in compliance with the approved plans.
 - 4.2 All privately-owned improvements shall be permanently maintained by the owner or an appropriately established homeowners association approved by the City Attorney.
 - 4.3 The site plan accompanying this permit shall be the basis for all interpretations of setbacks, yards, locations of buildings, location of parking and circulation elements, and similar matters.
 - 4.4 This resolution's terms, conditions, and requirements bind and obligate the permittee, its successors and assigns.
 - 4.5 The applicant shall sign and return the letter of acceptance to the City Clerk within 30 days following the approval of the special permit, provided, however, said 30-day period may be extended up to six months by administrative amendment. The clerk shall file a copy of the resolution approving the special permit and the letter of acceptance with the Register of Deeds, filing fees therefor to be paid in advance by the applicant.

**ANNEXATION NO. 02010,
CHANGE OF ZONE NO. 3390,
SPECIAL PERMIT NO. 1995,
HUB HALL HEIGHTS COMMUNITY UNIT PLAN,
and
PRELIMINARY PLAT NO. 02025,
HUB HALL HEIGHTS**

PUBLIC HEARING BEFORE PLANNING COMMISSION:

February 5, 2003

Members present: Carlson, Newman, Krieser, Taylor, Bills-Strand, Steward and Schwinn; Larson and Duvall absent.

Staff recommendation: Approval of the annexation, subject to an Annexation Agreement; approval of the change of zone and conditional approval of the community unit plan and preliminary plat.

Becky Horner of the Planning staff submitted a letter from Barbara Erickson, an adjacent property owner, requesting deferral for two weeks to review the application with the developer. She is also asking for a condition of approval that NW 40th not be extended north along the east property line of the development from W. Holdrege Street.

Horner also submitted a letter from Lyle Loth, on behalf of the developer, also requesting a two week deferral in order to advertise an additional waiver of the extension of N.W. 40th Street on the preliminary plat.

Steward moved deferral for two weeks, with continued public hearing and administrative action scheduled for February 19, 2002, seconded by Carlson and carried 7-0: Carlson, Newman, Krieser, Taylor, Bills-Strand, Steward and Schwinn voting 'yes'; Duvall and Larson absent.

There was no testimony in support nor in opposition.

CONT'D PUBLIC HEARING BEFORE PLANNING COMMISSION:

February 19, 2003

Members present: Newman, Carlson, Taylor, Bills-Strand, Duvall and Schwinn; Krieser, Larson and Steward absent.

Staff recommendation: Approval of the annexation, subject to an annexation agreement; approval of the change of zone; and conditional approval of the community unit plan and preliminary plat.

There were no ex parte communications disclosed by the Commissioners.

Proponents

1. **Hub Hall**, the developer, presented the application. He has met with City and has approval to proceed. We have called this plat "Heights" because it is one of the highest points in Lancaster County. There are lots of trees and lots of open space. The intent is to keep most of the trees except where a street may go through. He has counted 161 lots that back up to open space and to trees. The apartment units and 10 acres for the church site will help to improve the area. He believes this development will be a great improvement to the City.

2. **Brian Carstens** testified on behalf of the developer to discuss issues to be resolved. The extension of N.W. 40th Street is an issue. N.W. 40th was originally shown to be extended slightly north and then curve over to the east. The neighbor to the east finds this unacceptable. The developer worked with them to extend it straight north which was also unacceptable. They have also met with Dennis Bartels of Public Works, who suggests curving it over to the north and west. This would require filling 26' through the draw to get the road in with 6% slopes going down hill and would remove about 200' in width of trees through that draw. Carstens proposed that N.W. 40th Street not be extended north of Holdrege Street, and requested to add condition #1.1.26 to the preliminary plat: Delete future extension of N.W. 40th Street north of W. Holdrege.

Carstens requested that Condition #1.1.9 on the preliminary plat be deleted: W. Faesy Place extended north to No. 44th Street. Due to grading issues, it will not be possible to get the street up to No. 44th Street and the applicant believes a waiver of the block length is appropriate because of the topography of the site.

Carstens indicated that they will continue to work with staff on the street names (Condition #1.1.10).

Opposition

1. **Barbara Erickson and Martin Erickson**, the owners of Lot 27, SW1/4 of 17-10-6, and the adjacent 5.25 acres, testified in opposition to the extension of N.W. 40th Street. They have lived on the land for 22 years and have planted over 400 trees. If N.W. 40th Street is extended north, they would request a condition that all of N.W. 40th be used by the new development and that none of their land be taken away. Currently, they are showing N.W. 40th curving right into the Erickson property. At first, they were running N.W. 40th Street right into the Erickson property. The Ericksons desire to keep their land and their trees as they exist. If the street is not built, the Ericksons request that a condition of approval require that the lots located along the Erickson property line allow for a 66' future right-of-way in case there is a N.W. 40th extended at some point in the future. Another concern is the location of the sewer system. Is it going to go through their property? They have not seen any plans on the sewer system.

Martin Erickson expressed concerns about the noise issues with regard to the airport, etc.

Carlson inquired of staff regarding the sewer. Dennis Bartels of Public Works indicated that the lot is not developable until sewer is available from the east or northeast. At some point in time, the sewer will have to either go across their lot or in close proximity to get sewer service to serve the apartments. The apartments cannot be gravity sewered straight north where the single family lots are proposed to

be served. The single family lots are sewerable today with extensions from Ashley Heights. In Bartels' estimation, the apartment complex will not be able to be served until such time as the Oak Creek sanitary sewer is extended or parallel sewer identified to bring it to the south end of the airport runway. It is probably not feasible to get sewer into this facility until such time as that trunk sewer is built and sewer is extended from the trunk sewer. At this point, it will be an 8" sanitary sewer that we would normally expect to see as development occurs. However, the city is not unknown to negotiate or condemn an easement. The city has ways to get the sewer through but the city would have to pay for the easement and restore the area that was disturbed.

Carlson noted that there are conditions placing the burden upon the landowner of the apartments. Bartels indicated that the City will not initiate a project to make it sewerable. If it was to go across the Erickson's property, it would have to happen through an assessment district and would take City Council action. We cannot arbitrarily build a sewer across their property.

Carlson inquired as to the long term road network in this area. Bartels referred to the county road and Holdrege Street. The road east of this property was vacated by the County. There are no streets east or north of the 40th & Holdrege intersection, and the staff has recommended the 40th Street intersection be shown there because the existing 40th Street right-of-way splits that property line. It would have to start at a point which would take right-of-way from both properties. It would help protect the development potential of that property. They have 30' of frontage. Bartels believes 40th is as good a location as we can get. There is only one street at the 1/4 mile point and this would put another access point at the 1/2 mile line giving us the standard quarter mile spacing of streets. This 40th Street is not a lot of benefit to Mr. Hall's project, but the bigger benefit was visioned to be the future potential subdivision of the properties to the east.

Carlson inquired as to current and proposed development to the east and north. Becky Horner of Planning staff advised that the property is outside the urban service area and it is all AG zoning. The area east of here is within the current noise contour and does not allow residential. The Airport Authority is studying that presently but nothing has been adopted at this time. This particular area is in Tier I. The area to the east is not. The area to the north is also Tier I.

Bills-Strand made further inquiry into N.W. 40th Street. Bartels indicated that he does not object to curving it to the west. But as you approach Holdrege Street, it seemed more appropriate to line the intersection of 40th Street up with 40th as it goes south of Holdrege. The plan is envisioning that 40th Street would bend to the east. We're just looking at 40th as a collector type street to provide local access. As you go further north, there is no way to tie it into an arterial street system. It is basically a local street beyond the intersection north of Holdrege. Bartels tried to consider the land uses, but there are no uses yet identified to the east. If it provides primary access to an industrial area, it may not be the best spot for a residential street. The city has no desire to go and condemn the right-of-way and force that street to be built until development occurs to the east. Holdrege Street is vacated east of 40th Street.

Ray Hill of Planning staff referred to the aerial photograph on page 56. The developer did not want to cross any more of the wooded area than is necessary. If 40th went straight north it would go through the middle of that wooded area. By swinging it to the east it moves away from and does not go through the wooded area. We have not required 40th Street along the east side of any of the residential

developments further to the north of this project. Typically, the grid system is for the mile sections. 48th Street is the north/south carrier through this area and to have another street parallel would not be appropriate.

Bills-Strand wondered what happens to the Erickson property if nothing is done with 40th Street and this plat is approved. Hill advised that whenever that area is available for development and for subdivision, then they would tie into the street system that is proposed in this area, just like this area has tied onto the development to the north. The staff did ask that a street extend to the east so that as that area does become available for development, it has a street pattern to tie onto.

Schwinn asked whether staff agrees with the developer that we do not want to do the evasive grading through the green space. Hill indicated that staff agrees with the layout as proposed. Staff is requesting the extension of N.W. 40th Street and the curving to the east is acceptable. The road would not have to be built until the Ericksons decide they want to subdivide or it is needed for the multi-family area in this development.

Carstens stated that the apartments will not be built until the sewer is brought in. West Gately Street has been relocated. The south right-of-way will touch the Erickson lot line but will never go through their property. It will only be adjacent.

Marvin Krout, Director of Planning, believes that a note can be added to the plat regarding this discussion about N.W. 40th Street and the language can be worked out between now and the City Council.

Public hearing was closed.

COMMUNITY UNIT PLAN
LEGAL DESCRIPTION:

Lot 14 and a portion of Lot 32 of Irregular Tracts located in the Southeast Quarter of Section 18, Township 10 North, Range 6 East of the 6th P.M., Lincoln, Lancaster County, Nebraska and wholly described as follows:

Referring to the Southwest corner of the Southeast Quarter of said Section 18; THENCE in a Northerly direction, along the West line of the Southeast Quarter of said Section 18, on an assumed bearing of North 00 degrees 45 minutes 21 seconds West for a distance of 846.58 feet to the Point of Beginning.

THENCE continuing in a Northerly direction, along the West line of the Southeast Quarter of said Section 18, on an assumed bearing of North 00 degrees 45 minutes 21 seconds West for a distance of 1502.37 feet to the Northwest corner of said Lot 32;

THENCE North 88 degrees 49 minutes 52 seconds East, along the North line of said Lot 32, for a distance of 2639.59 feet to the Northeast corner of said Lot 32

THENCE South 00 degrees 50 minutes 46 seconds East, along the East line of the Southeast Quarter of said Section 18, for a distance of 2347.52 feet to the Southeast corner of the Southeast Quarter of said Section 18

THENCE South 88 degrees 48 minutes 02 seconds West, along the South line of the Southeast Quarter of said Section 18, for a distance of 1644.57 feet

THENCE North 01 degrees 11 minutes 58 seconds West, for a distance of 98.76 feet
THENCE North 55 degrees 35 minutes 05 seconds West, for a distance of 90.94 feet
THENCE North 38 degrees 08 minutes 59 seconds West, for a distance of 90.94 feet
THENCE North 20 degrees 42 minutes 53 seconds West, for a distance of 90.94 feet
THENCE North 04 degrees 39 minutes 24 seconds West, for a distance of 81.24 feet
THENCE North 73 degrees 00 minutes 50 seconds West, for a distance of 76.38 feet
THENCE North 64 degrees 18 minutes 00 seconds West, for a distance of 73.59 feet
THENCE North 61 degrees 12 minutes 11 seconds West, for a distance of 241.00 feet
THENCE North 28 degrees 47 minutes 49 seconds East, for a distance of 110.00 feet
THENCE North 61 degrees 12 minutes 11 seconds West, for a distance of 50.00 feet
THENCE South 28 degrees 47 minutes 49 seconds West, for a distance of 110.00 feet
THENCE North 61 degrees 12 minutes 11 seconds West, for a distance of 247.65 feet
THENCE North 50 degrees 02 minutes 26 seconds West, for a distance of 86.46 feet
THENCE North 35 degrees 50 minutes 24 seconds West, for a distance of 86.53 feet
THENCE South 89 degrees 14 minutes 39 seconds West, for a distance of 109.34 feet to the Point of Beginning

Together with and subject to covenants, easements, and restrictions of record.
Said property contains 129.81 acres more or less.

Mr. Marvin Krout
Director of Planning
City of Lincoln/ Lancaster County
555 South 10th Street
Lincoln, NE 68508

RE: HUB HALL HEIGHTS
PRELIMINARY PLAT & COMMUNITY UNIT PLAN
CHANGE OF ZONE ('AG' TO 'R-3') & ANNEXATION

Dear Mr. Krout,

On behalf of Hubert H. Hall, we submit the above mentioned applications for your review. This site contains 142.39 acres and is currently zoned 'AG' and we are proposing 'R-3' with a C.U.P..

The area of the project is located outside the city limits. We are requesting to be annexed into the city limits at this time.

We have completed density calculations which shows 953 units are the total units allowed. We are proposing to develop 357 single-family lots/units, one multi-family lot with 400 units, one future church lot, 195 unassigned units and 5 outlots. The unassigned units shall be used to add single family, duplex lots and/or single family attached. The proposed development has public streets with public water, public sanitary sewer and public storm sewer to serve the site. There will be a Homeowners Association for maintenance of the outlots, which serves as detention and open space.

We have shown a right-of-way dedication 60 feet along N.W. 48th Street. It has come to our knowledge that the development to the north (Ashley Heights), was allowed to dedicated only 40 feet of right-of-way. If there is a possibility for us to match that it would allow us to increase the lot depth adjacent to N.W. 48th Street and may allow more grading alternatives for the public sidewalk.

We are requesting the following waivers to maintain existing drainage, tree masses and natural topography:

1. Block length on the east side of N.W. 46th Street from 1,320 feet to 1,763.75 feet. Block length on the south side of W. Hall Drive from 1,320 feet to 1,410.84 feet. Block length on the east and south side of N.W. 45th Street/W. Keady Lane/N.W. 41st Street from 1,320 feet to 2,260.71 feet. Block length on the north and west side of W. Keady Lane/N.W. 41st Street from 1,320 feet to 1,354.25 feet.

Memorandum

To:	Becky Horner, Planning Department
From:	Chad Blahak, Public Works and Utilities
Subject:	Hub Hall Heights Addition Preliminary Plat and C.U.P./Special Permit
Date:	1/22/03
cc:	Randy Hoskins Dennis Bartels Nicole Fleck-Tooze Virendra Singh Ben Higgins

Engineering Services has reviewed the re-submitted preliminary plat and community unit plan for Hub Hall Heights Addition, located east of N.W. 48th Street, north of Holdrege Street and has the following additional comments & clarifications concerning this plat::

The existing culvert in N.W. 48th Street needs to be shown as per the meeting.

The sanitary sewer needs to be revised in the north east corner of the plat. It is currently located under the dam of a proposed detention facility. This is unacceptable.

Sanitary sewer has not been extended to the property lines at drainage basin entry points into the development as per the planning directors letter dated December 10, 2002.

The proposed alternate to serve the proposed apartment complex with a lift station is unsatisfactory. The apartment lot cannot be developed until a sewer outlet is available from the east.

The grading in N.W. 41st Court, West Facy Street, and N.W. 47th Street needs to be revised as per the meeting January 22, 2003. Due to the large grade changes front to back across several areas on this plat Public works recommends that the grading plan and /or lot layout be revised to provide more desirable lots for building.

Public Works does not approve any drive way location for Lot 30 Block 12 onto Holdrege Street until a final site plan and use for the lot is approved.

The information shown on the preliminary plat relating to the public water main system, public sanitary sewer system, and public storm sewer system has been reviewed to determine if the

sizing and general method providing service is satisfactory . Design considerations including, but not limited to, location of water main bends around curves and cul-de-sacs, connection of fire hydrants to the public main, temporary fire hydrant location, location and number of sanitary sewer manholes, location and number of storm sewer inlets, location of storm sewer manholes and junction boxes, and the method of connecting storm sewer inlets to the main system are not approved with this review. These and all other design considerations can only be approved at the time construction drawings are prepared and approved.

Nicole Fleck-Tooze
Virendra Singh
Ben Higgins

Engineering Services has reviewed the re-submitted preliminary plat and community unit plan for Hub Hall Heights Addition, located east of Northwest 48th Street, north of Holdrege Street and has the following comments:

- Public Works has additional concerns about the grading and drainage plan and wishes to meet with the developers engineer to discuss said issues and required revisions to the drainage study and grading plan.
- The sanitary sewer in Northwest 47th Street is shown to be 15' deep at the north property line. The sewer will run opposite street grade in Northwest 47 Street until the first east-west street in the Ashley Heights 1st Addition development to the north. This will force the sewer to be deeper than 15'. No waivers of design standards for sewer depth have been approved for the Ashley Heights 1st development. The sewer in this plat will be less than 15' deep at the property line.
- Sanitary sewer has not been extended to the property lines at drainage basin entry points into the development as per the planning directors letter dated December 10, 2002.
- The proposed alternate to serve the proposed apartment complex with a lift station is unsatisfactory. The apartment lot cannot be developed until a sewer outlet is available from the east.
- The annexation agreement for this plat should require this development to pay for the equivalent of ½ the cost of a 6" water main for its frontage on the existing and proposed 16" and 12" main in Northwest 48th Street.
- Public Works does not approve any drive way location for Lot 30 Block 12 onto Holdrege Street until a final site plan and use for the lot is approved.

- This developer should be required to make a contribution toward the future urban street paving of Northwest 48th Street. With other plats, Public Works has recommended a contribution equivalent to $\frac{1}{2}$ the cost of a 3 lane suburban cross-section street. Allowing the plat adjacent to Northwest 48th Street without requiring an urban cross section is an exception to subdivision ordinance requirements.
- The information shown on the preliminary plat relating to the public water main system, public sanitary sewer system, and public storm sewer system has been reviewed to determine if the sizing and general method providing service is satisfactory . Design considerations including, but not limited to, location of water main bends around curves and cul-de-sacs, connection of fire hydrants to the public main, temporary fire hydrant location, location and number of sanitary sewer manholes, location and number of storm sewer inlets, location of storm sewer manholes and junction boxes, and the method of connecting storm sewer inlets to the main system are not approved with this review. These and all other design considerations can only be approved at the time construction drawings are prepared and approved.

City of Lincoln, Nebraska

IMPORTANT

All revisions to plans must include Building Permit # and Job Address.

Return this report with two sets of corrected plans. The corrections noted below are required to be made to the plans prior to issuance of a permit. Please indicate under each item where the correction is made by plan sheet number or plan detail number.

A separate set of plans for review and final approval must be submitted by the licensed installing contractor/s if fire suppression systems, sprinklers, dry powder, fire alarm systems or underground tanks are installed.

**LINCOLN-LANCASTER COUNTY HEALTH DEPARTMENT
INTER-OFFICE COMMUNICATION**

TO: Becky Horner

DATE: November 27, 2002

DEPARTMENT: Planning

FROM: Chris Schroeder
Ron Marquart

ATTENTION:

DEPARTMENT: Health

CARBONS TO: Bruce Dart, Director
EH File
EH Administration

SUBJECT: Hub Hall Heights
PP #02025, CZ #3390
SP #1995, Annex #02010

The Lincoln-Lancaster County Health Department (LLCHD) has reviewed the plat for the proposed Hub Hall Heights and conducted an on-site visit. There are no existing homes on this proposed plat. This plat consists of native prairie grassland and narrow tree growth areas in the drainage ways. The following items are noted:

- Water supply is proposed to be the City of Lincoln Water System.
- Sewage is proposed to be the Lincoln Wastewater System.
- All wind and water erosion must be controlled during construction. The Lower Platte South Natural Resources District should be contacted for guidance in this matter.
- During the construction process, the land owner(s) will be responsible for controlling off-site dust emissions in accordance with Lincoln-Lancaster County Air Pollution Regulations and Standards Article 2 Section 32. Dust control measures shall include, but not limited to application of water to roads, driveways, parking lots on site, site frontage and any adjacent business or residential frontage. Planting and maintenance of ground cover will also be incorporated as necessary.
- Provisions should be made for retaining as much tree mass as possible. Alternately, the applicant will need to plan for disposal of tree waste by burying on site, grinding, offering for firewood or hauling to the landfill. Permits for open burning of tree waste within the city limits will not be approved and applications for burning within the 3-mile zone are unlikely to be approved.

INTER-DEPARTMENT COMMUNICATION

DATE November 19, 2002

TO Becky Horner, City Planning

FROM Sharon Theobald
(Ext. 7640)

SUBJECT DEDICATED EASEMENTS
DN #18N-44W

Attached is the Preliminary Plat for Hub Hall Heights.

In reviewing the dedicated transmission line or other electrical easements shown on this plat, LES does not warrant, nor accept responsibility for the accuracy of any such dedicated easements.

ALLTEL, Time Warner Cable, and the Lincoln Electric System will require the additional easements marked in red on the map, along with blanket utility easements over all of the Outlots and a blanket utility easement, excluding building envelopes, over Lot 30, Block 11.

Subject: West Holdrege, NW 40th to NW 48th

Marvin

As you requested I have searched through the Comp Plan in regards to West Holdrege, NW 40th to NW 48th, which is adjacent to the Hub Hall Heights preliminary plat and CUP.

This segment of road is unclassified currently and is NOT shown on any of future Functional Classification maps of the Comp Plan. It is NOT shown as future arterial nor collector and is not shown for future improvement.

A portion from NW 48th, east approximately 1/4 mile (maybe NW 44th) is shown on the "Tier I and II Right-of-Way" for 120 feet of ROW. This would appear to be done to reflect the intersection improvement of N. W. 48th Street and West Holdrege west of N.W. 48th to NW 70th. Intersection improvements often continue several blocks in all directions and onto roads that are not otherwise shown for improvement.

Steve
